

## CRM-APPLICATION-FOR-SCHOOL/COLLEGES

### 1 INTRODUCTION

#### 1.1 Overview

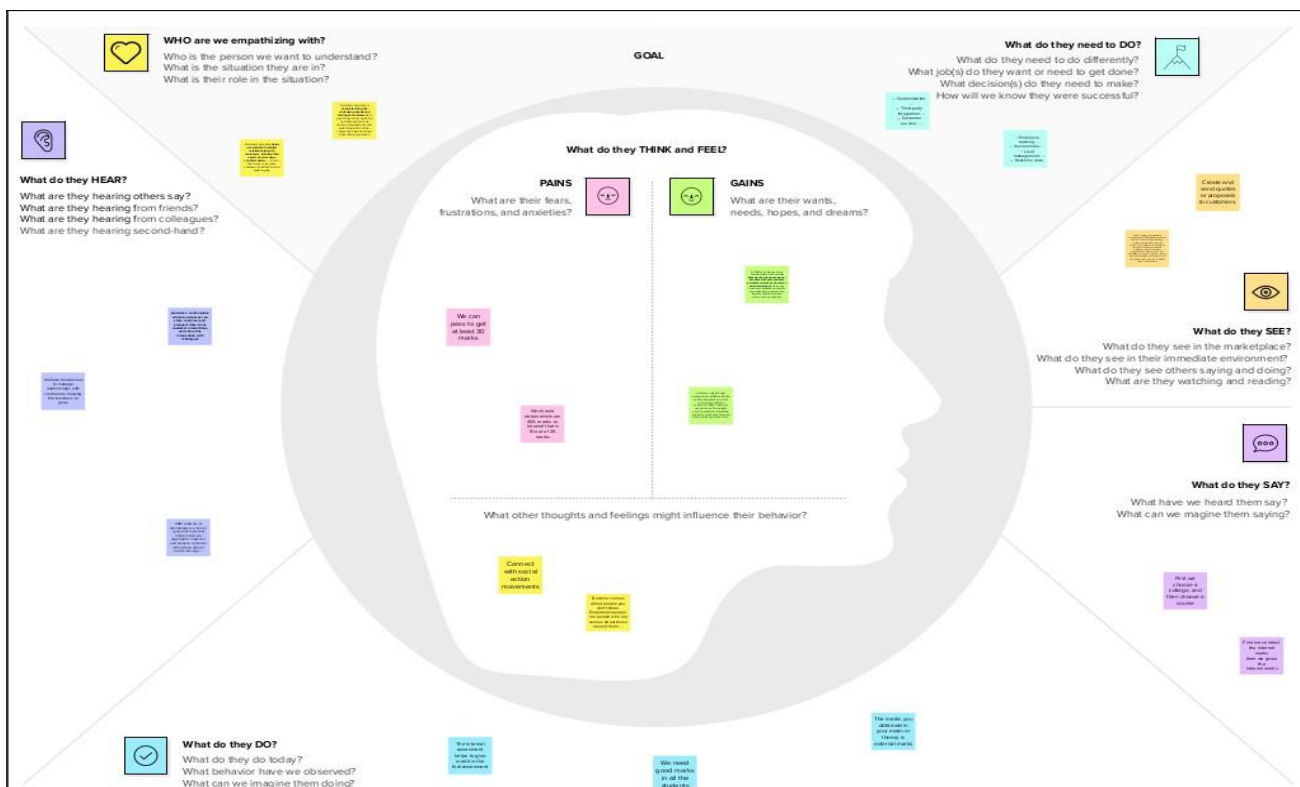

Customer relationship management (CRM) is the combination of practices, strategies and technologies that companies use to manage and analyze customer interactions and data throughout the customer lifecycle. The goal is to improve customer service relationships and assist in customer retention and drive sales growth.

#### 1.2 Purpose

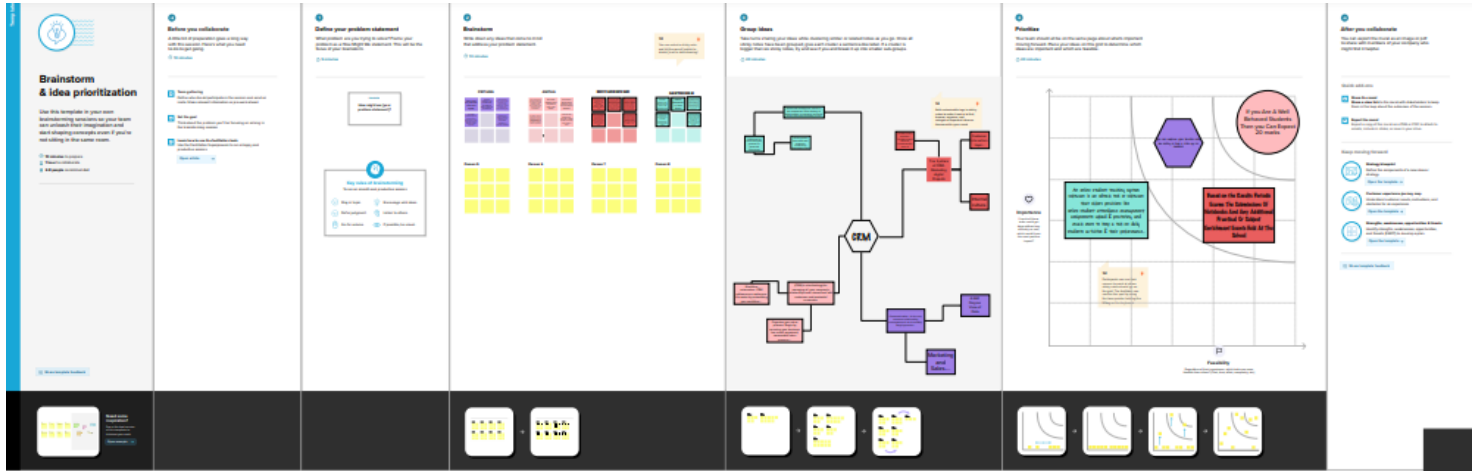

Customer relationship management (CRM) is a technology for managing all your company's relationships and interactions with customers and potential customers. The goal is simple: Improve business relationships. A CRM system helps companies stay connected to customers, streamline processes, and improve profitability.

### 2 Problem Definition & Design Thinking

#### 2.1 Empathy Map Canvas

## 2.2 Brainstorming & Idea Prioritization Template

## 3 RESULT

### 3.1 Data Model:

Object Name	Fields in the Object	
School	Field label	Data type
	Address	Text area
	District	Text area
	State	Text area
	School	Text area
	Phone Number	Phone
	No of Students	Roll up Summary
	Highest Mark	Roll up Summary

### Student

Field label	Data type
Phone Number	Phone
School	Master-Detail Relationship
Result	Picklist
Class	Number

### Parent

Field label	Data type
Parent Address	Text Area
Parent Number	Phone

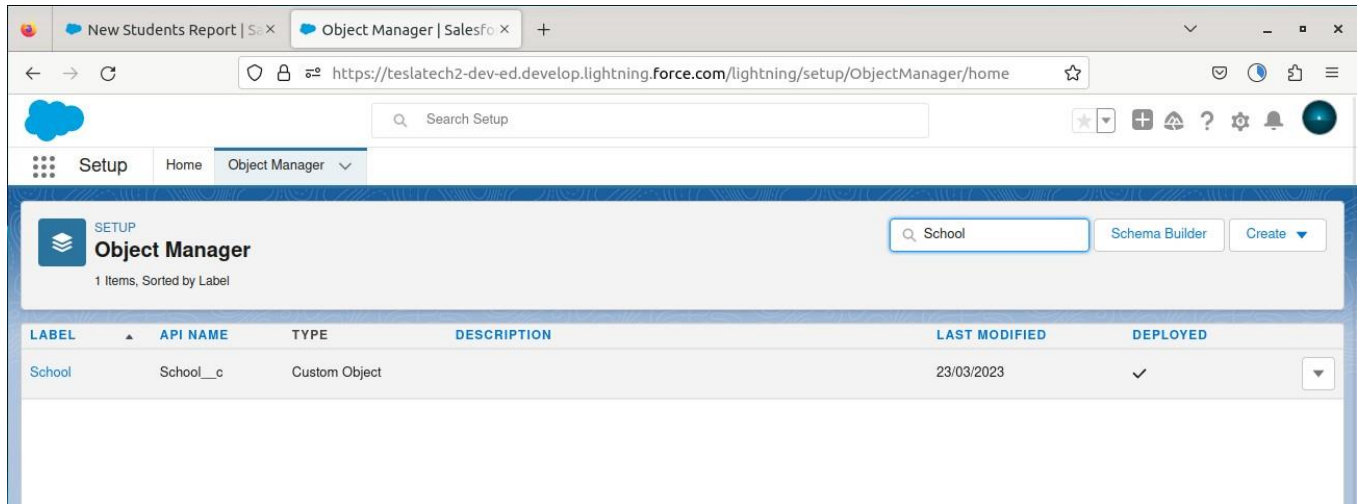

## 3.2

### Activity & Screenshot

(Milestone-2:OBJECT)

#### Activity-1 : Creation of School Object

# Creation of Object for School Management

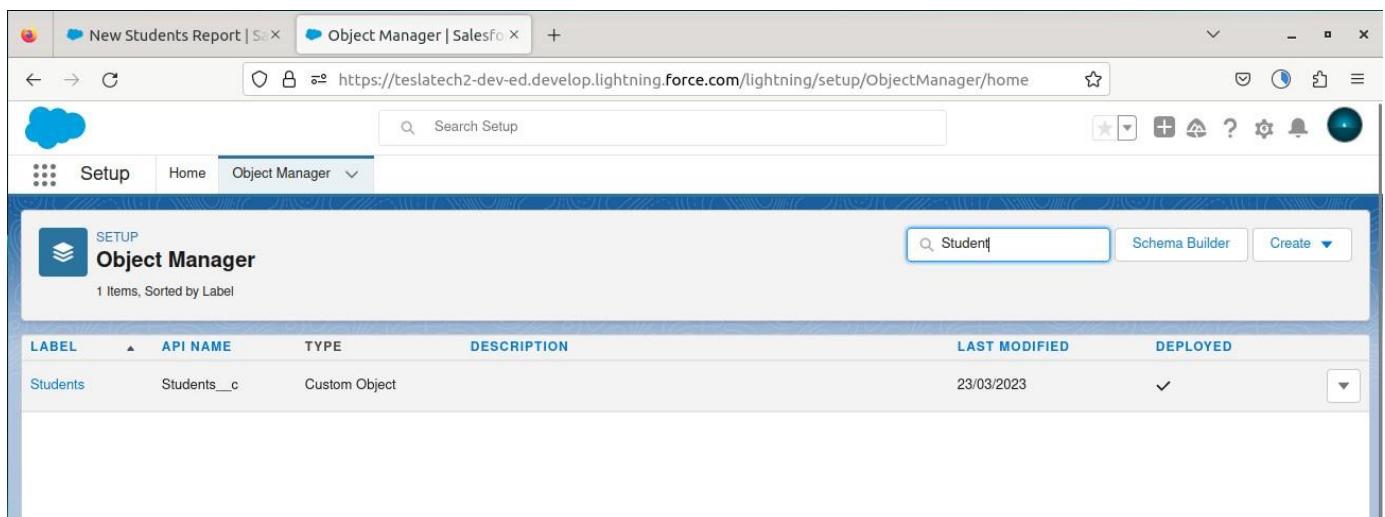

The screenshot shows the Salesforce Object Manager interface. The browser address bar displays the URL: `https://teslatech2-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/home`. The page header includes a search bar with the text "Search Setup" and a navigation menu with "Setup", "Home", and "Object Manager". The main content area is titled "Object Manager" and shows "1 Items, Sorted by Label". Below this is a table with the following data:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
School	School__c	Custom Object		23/03/2023	✓

( Milestone-2:OBJECT )

## Activity-2 : Create Student Object

# Creation of Student Object

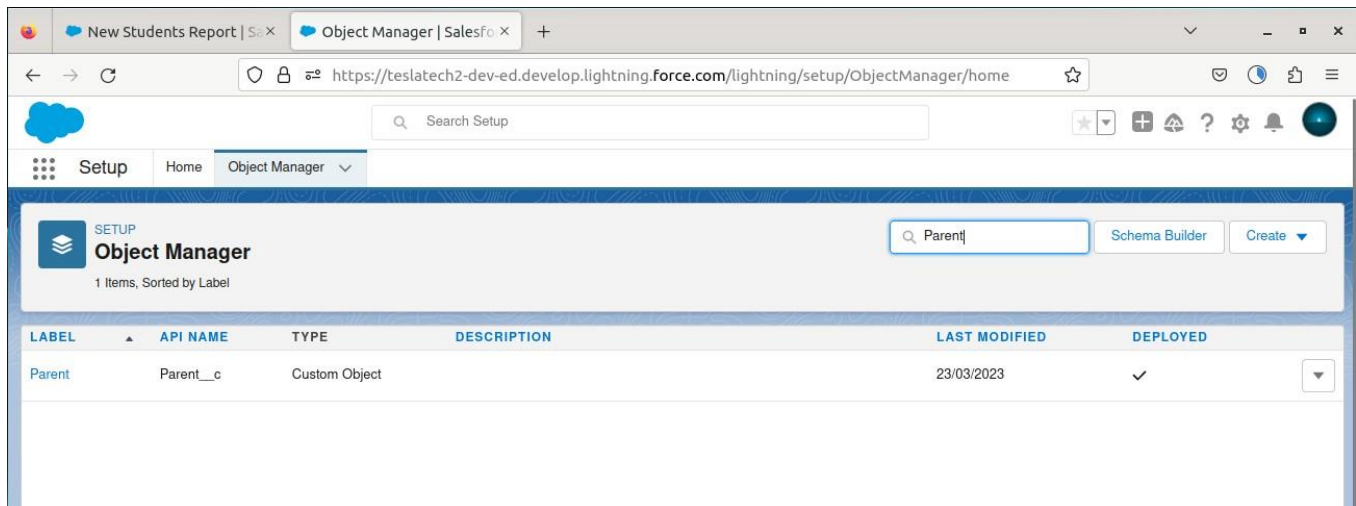

The screenshot shows the Salesforce Object Manager interface after creating a new object. The browser address bar displays the URL: `https://teslatech2-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/home`. The page header includes a search bar with the text "Search Setup" and a navigation menu with "Setup", "Home", and "Object Manager". The main content area is titled "Object Manager" and shows "1 Items, Sorted by Label". Below this is a table with the following data:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Students	Students__c	Custom Object		23/03/2023	✓

( Milestone-2: OBJECT )

### Activity-2 : Create Parent Object

# Creation of Parent Object

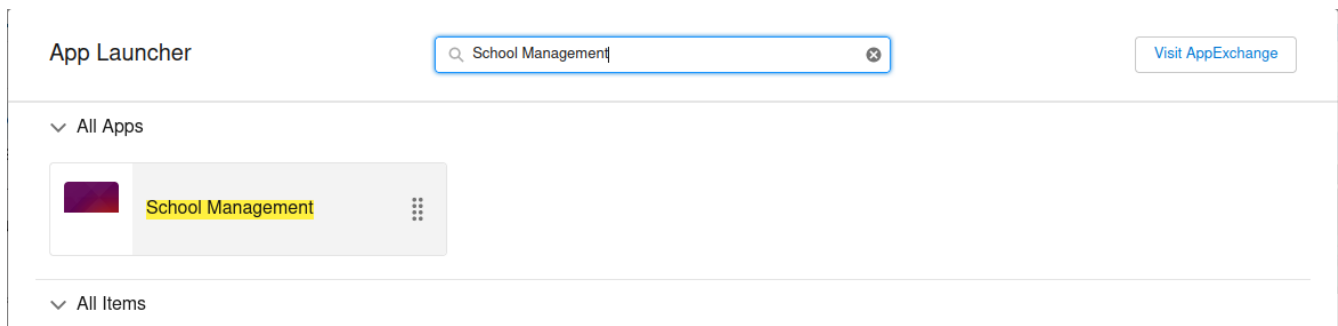

The screenshot shows the Salesforce Object Manager interface. The browser address bar displays the URL: <https://teslatech2-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/home>. The page title is "Object Manager" with a sub-header "1 Items, Sorted by Label". A search bar contains the text "Parent". Below the search bar, a table lists the objects:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Parent	Parent__c	Custom Object		23/03/2023	✓

( Milestone-3: LIGHTNING APP )

### Activity-1 : Create the School Management App

# Creation School Management App

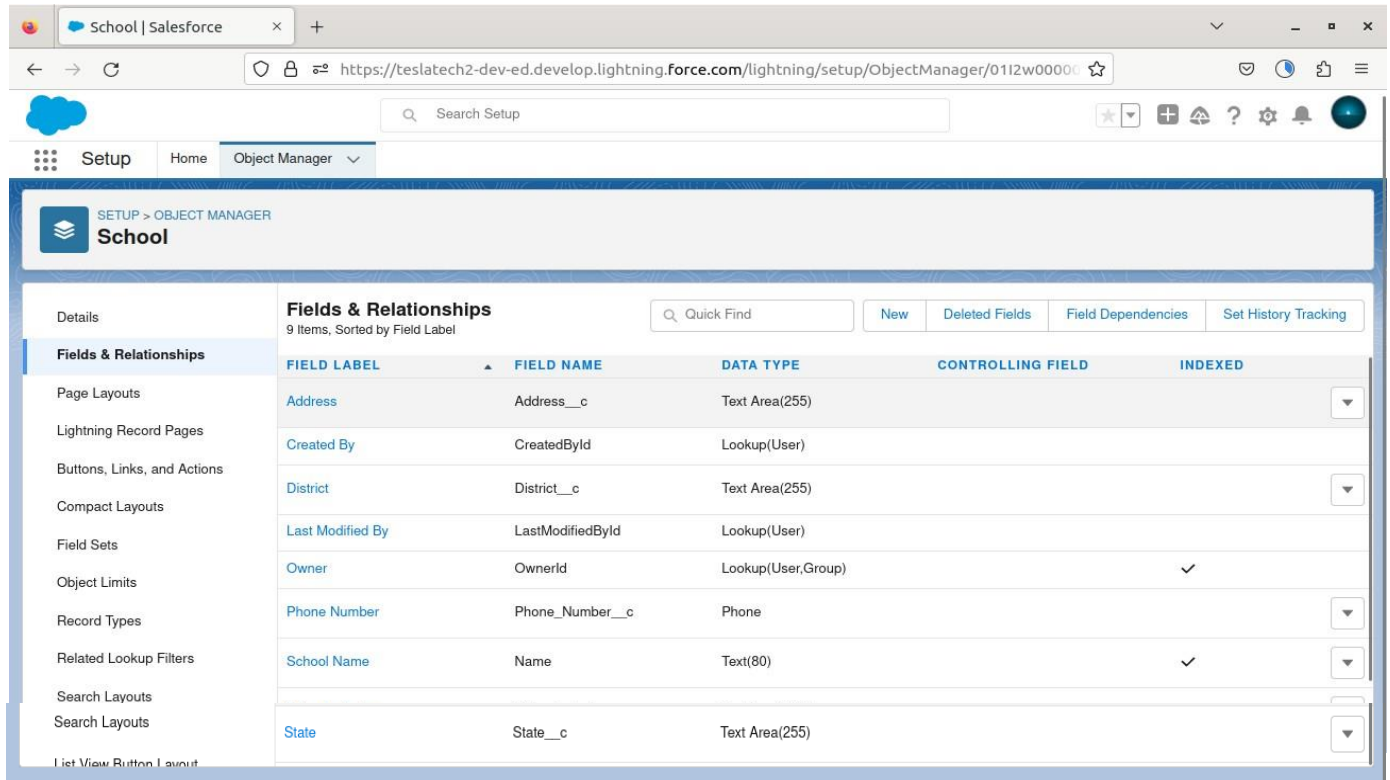

The screenshot shows the Salesforce App Launcher interface. The search bar contains the text "School Management". Below the search bar, a list of apps is displayed under the heading "All Apps". The first app listed is "School Management", which is highlighted with a yellow background. The app icon is a purple square with a white 'S'.

## ( Milestone-4: FIELDS & RELATIONSHIP )

### Activity-1 : Creation of fields for the School Objects

#### # Creation of fields for the School Object

The screenshot shows the Salesforce Setup interface for the 'School' object. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and List View Button Layout. The main content area is titled 'Fields & Relationships' and shows a list of 9 items, sorted by Field Label. The list includes fields like Address, Created By, District, Last Modified By, Owner, Phone Number, School Name, and State, each with its field name, data type, and whether it is indexed.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Address	Address__c	Text Area(255)		
Created By	CreatedById	Lookup(User)		
District	District__c	Text Area(255)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Phone Number	Phone_Number__c	Phone		
School Name	Name	Text(80)		✓
State	State__c	Text Area(255)		

## ( Milestone-4: FIELDS & RELATIONSHIP )

### Activity-2 : Creation of fields for the Student Objects

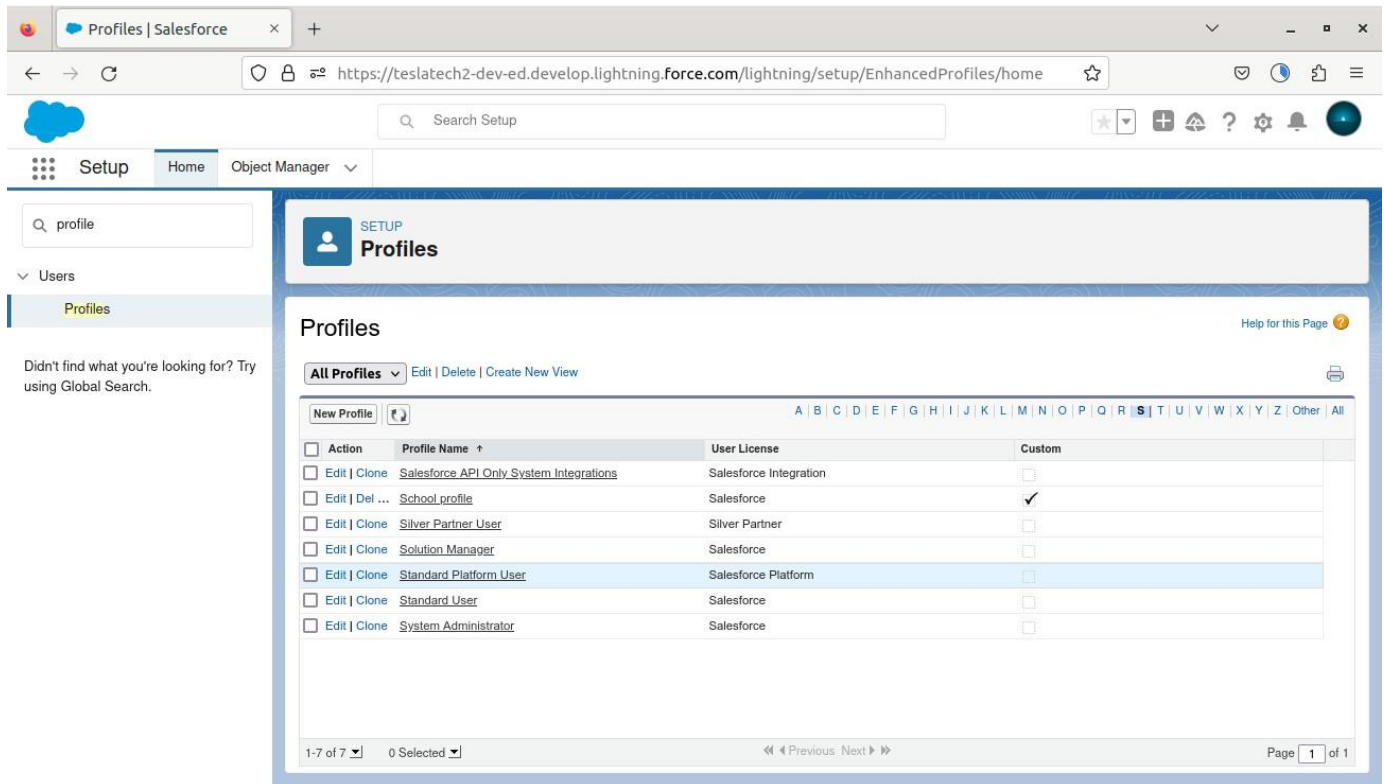

#### # Creation of fields for the Student Object

( Milestone-5: PROFILE )

### Activity-1 : Creation on Profile

# Creation on Profiles

The screenshot shows the Salesforce Setup interface for Profiles. The left sidebar contains a search bar with "profile" entered, and a list of navigation items: Users, Profiles (selected), and a message "Didn't find what you're looking for? Try using Global Search." The main content area is titled "Profiles" and includes a "New Profile" button and a list of existing profiles. The table below shows the details of these profiles.

Action	Profile Name	User License	Custom
<input type="checkbox"/> Edit   Clone	Salesforce API Only System Integrations	Salesforce Integration	<input type="checkbox"/>
<input type="checkbox"/> Edit   Del ...	School profile	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/> Edit   Clone	Silver Partner User	Silver Partner	<input type="checkbox"/>
<input type="checkbox"/> Edit   Clone	Solution Manager	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit   Clone	Standard Platform User	Salesforce Platform	<input type="checkbox"/>
<input type="checkbox"/> Edit   Clone	Standard User	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit   Clone	System Administrator	Salesforce	<input type="checkbox"/>

At the bottom of the table, it shows "1-7 of 7" and "0 Selected". The page number "Page 1 of 1" is also visible.

( Milestone-6: USERS )

### Activity-1 : Creating a Users

( Milestone-8: REPORTS )

## Activity-1 : Reports

# Reports

The screenshot shows the Salesforce Reports page in a web browser. The browser address bar displays the URL: <https://testlatech2-dev-ed.develop.lightning.force.com/lightning/o/Report/home?queryScope=mru>. The Salesforce navigation bar at the top includes links for Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, and More. The Reports section is active, showing a 'Recent' report list with 3 items. A search bar for recent reports is located at the top right of the report list. The report list table has columns for Report Name, Description, Folder, Created By, Created On, and Subscribed. The first three reports are 'New Students Report', 'New Schools Report', and 'New Parents Report', all created by 'SACHINDRA P' on 14/4/2023. The left sidebar contains navigation links for Reports, FOLDERS, and FAVORITES.

REPORTS	Report Name	Description	Folder	Created By	Created On	Subscribed
Recent	New Students Report		Private Reports	SACHINDRA P	14/4/2023, 10:47 am

**[ADVANTAGES]****1. Better customer service**

Modern CRM software has many functions, but the software was created to improve business-customer relationships, and that's still its main benefit. A CRM manages all of your contacts and gathers important customer information— like demographics, purchase records and previous messages across all channels – and makes it easily accessible to anyone in your company who needs it. This ensures that your employees have all they need to know about the customer at their fingertips and can provide a better customer experience, which tends to boost customer satisfaction.

**2. Increased sales**

A CRM tool can help you streamline your sales process, build a sales pipeline, automate key tasks and analyze all of your sales data in one centralized place, potentially increasing sales and productivity. A CRM helps you establish a step-by-step sales process that your employees can rely on every time and that you can easily tweak as issues arise.

**3. Improved customer retention**

Once you've procured and converted leads, it's vital that you put in the work to retain them as customers and promote customer loyalty. High customer turnover can have many negative effects for your business, like diminished revenue or disrupted cash flow, so use your CRM and the information it provides about your customers to encourage repeat business. The CRM will provide sentiment analysis, automated ticketing, customer support automation and user behavior tracking to help you determine problems and quickly address them with your customers.

**4. Detailed analytics**

It's one thing to have plenty of data about your customers, but you need to know what it means and how to use it. CRM software typically has built-in analytic capabilities to contextualize data, breaking it down into actionable items and easily understood metrics. Metrics such as click-through rates, bounce rates, and demographic information allow you to judge the success of a marketing campaign and optimize accordingly.

## 5. Higher productivity and efficiency

CRM software uses marketing automation technology, which expedites menial tasks like drip campaigns and frees up your employees' time to focus on work only humans can handle, like creating content. It can also ensure that no tasks slip through the cracks (e.g., all important emails are always sent to the right people). Additionally, a CRM can show you a dashboard of how your business processes are working and where your workflows could improve. [Read related article: [How Workplace Automation Software Can Help Your Business](#)]

## 6. Automated sales reports

Your team can easily collect and organize data about prospective and current customers using the CRM software's dashboard and reporting features, which allow employees to automate and manage their pipelines and processes. The CRM can also help your team members evaluate their performance, track their quotas and goals, and check their progress on each of their projects at a glance.

## **[DISADVANTAGES]**

### 1. A costly project

CRM software tool is an expensive investment that some businesses can only afford, and if they do invest, it doesn't guarantee the return on investment is worth it. It is a huge investment that factors like data migration, integration cost, training, and support also affect.

Even for a locally hosted customer relationship management system, the company is associated with overhead costs because they require to pay professionals like software developers, system administrators, and maintenance personnel. These people ensure that the software works properly and maintain the data backups, too that also an expense with running a customized CRM.

### 2. Have poor usability

Some CRM systems could be more user-friendly as users need to learn how to use CRM to save time and energy to make the system work according to them. Some small businesses try to refrain from using CRM as they need help handling it.

### 3. CRM is not fully customized

A business can only customize a CRM system and make CRM fit their specific needs and requirements. It can create problems for CRM users; they get frustrated and need help to make the system work according to their requirements.

### 4. Having lots of security concerns

There are many security issues with CRM, such as data loss and data being hacked by someone. In CRM, the collected data is stored at one centralized location that can be accessed by unfair means. In another case, inaccurate data can be added by employees, or they manipulate figures leading to wrongful planning.

### 5. Not suitable for every business

Every business can't afford CRM for data collection and connecting with customers. Some businesses can't connect to the customers directly therefore, they don't need a CRM tool. Forming CRM to make it function properly company or business has to spend a lot of money, including various phases.

### 6. CRM is not fully customized

A business can only customize a CRM system and make CRM fit their specific needs and requirements. It can create problems for CRM users; they get frustrated and need help to make the system work according to their requirements.

### 7. Experience-based procedure in all the stages

Small businesses may not require it, but large businesses use CRM on a large scale. For this purpose, they train their employees by providing training sessions from the appointed professionals. The company invests in employee training to improve its productivity, where employees encounter and learn the various features and functions of CRM. This experience will help them in all the stages of CRM.

## **APPLICATIONS**

( Applications of a CRM – Examples and Strategies )

- \* Application 1: Tracking Customers
- \* Application 2: Collecting Data for Marketing
- \* Application 3: Improving Interactions and Communications
- \* Application 4: Streamlining Internal Sales Processes
- \* Application 5: Planning Your Operations.

## **CONCLUSION**

Business is an ongoing process that has to update itself with time (adopt new technologies) to remain in the competition. Before technology, customer data or CRM was based on papers, but slowly, companies started tracking customer-related data with spreadsheets, emails, address books, and other ways.

But due to a lack of automation and integration, it becomes difficult for them to find and share up-to-date information when required quickly. It also down their ability to create marketing strategies, provide customers flawless service, and peruse new sales leads.

CRM is a powerful tool that automatically collects information about existing and prospective customers (their personal or professional information, including social media posts, phone numbers, email addresses, phone numbers, service, purchase history, and support tickets). Further, the whole information is integrated by the system and generates consolidated profiles that can be shared with appropriate teams. One of the best features of CRM is that it can connect with other business tools, such as document-sharing apps and online chat.

Artificial intelligence and business intelligence capabilities are built in CRM that accelerate administrative tasks and provide actionable insights. Customer relationship management's advantages and disadvantages will help you understand it in detail.

(Image result for crm future scope)

“[The future of CRM] is about which companies will be able to pivot to meet the changing needs and trends — driven by customer expectations. Customers expect organizations to know a lot about them and expect to have conversations.”
